Model 0110 Post Former

The Evans Midwest Model 0110 Post Former produces counter tops of uniform quality each and every time. It forms most radiuses without time consuming adjustments. The Model 0110 features a pneumatic assisted heater that speeds up your production and cuts down on operator fatigue. This model features an adjustable leaf that allows the operator to easily set the leaf spacing for the build down from 1/2" to 1 1/2".

Covering only 48 square feet of valuable floor space, this workhorse forms the laminate to the base contour and holds it under pressure until the adhesive has cured. The forming and adherence of the laminate to the core is a single step operation. The Post Former has the capacity to turn out double rolled cabinet doors and window sills in addition to counter and vanity tops without any machine adjustments.

It all adds up to the kind of time-savings manufacturers need to operate at peak efficiency.

Semi-automatic post forming machine proven a perfect fit around the world, in all sized operations.

Technical Specifications

Electrical: 220 Volt 1 Phase, 14.5 KW

Motor: (hand held trimmer) 1/3 HP

Required Amps: 80

Working Height: 36"

Controls: Pneumatic Push Button

Maximum Post Forming Length: 12'

Air Requirement: 100 PSI

Heater: Overhead-Radiant, Cove

Heated Bar

Foot Print: 180" X 28"

Shipping Weight: 1500 LBS
