Model 4283 Lay Up Table

Technical Specifications

Our new 4283 Model gives customers another option for their HPL lay up lines. This heavy duty table uses self cleaning minimal contact rollers to support the glued substrates as it indexes over the backer board.

Our innovative back bending feature clamps the leading edge, lifting it slightly to keep the substrate from drooping and dragging on the backer. This machine is very easy to operate and simple to clean.

Note: Unit is shown with our 4270 Laminate Rack attached.

Max. Board Size: 62" X 145"
Min. Board Size: 24" X 24"
